I am skilled IT professional in databases, application programming and maintenance. My motivation is to deliver modern business intelligence solutions and cooperate with the best professionals. I have proven technical background for BI solutions and business knowledge in finance industry. I have direct experience with the standard market investment software (Sungard, Investran) and software development experience on custom solution for the insurance linked securities portfolios and risk management. I used working in the international and multicultural environment. I have skills with the remote cooperation with teams located in England, Switzerland, Ireland and India. I am always happy learning new things, ideas and technologies. I'm sure I can be valuable asset for your company in several roles comprising sql developer, etl developer, c# programmer, asp.net developer or application administrator.

General skills
